Build the power of pick2heal into your software
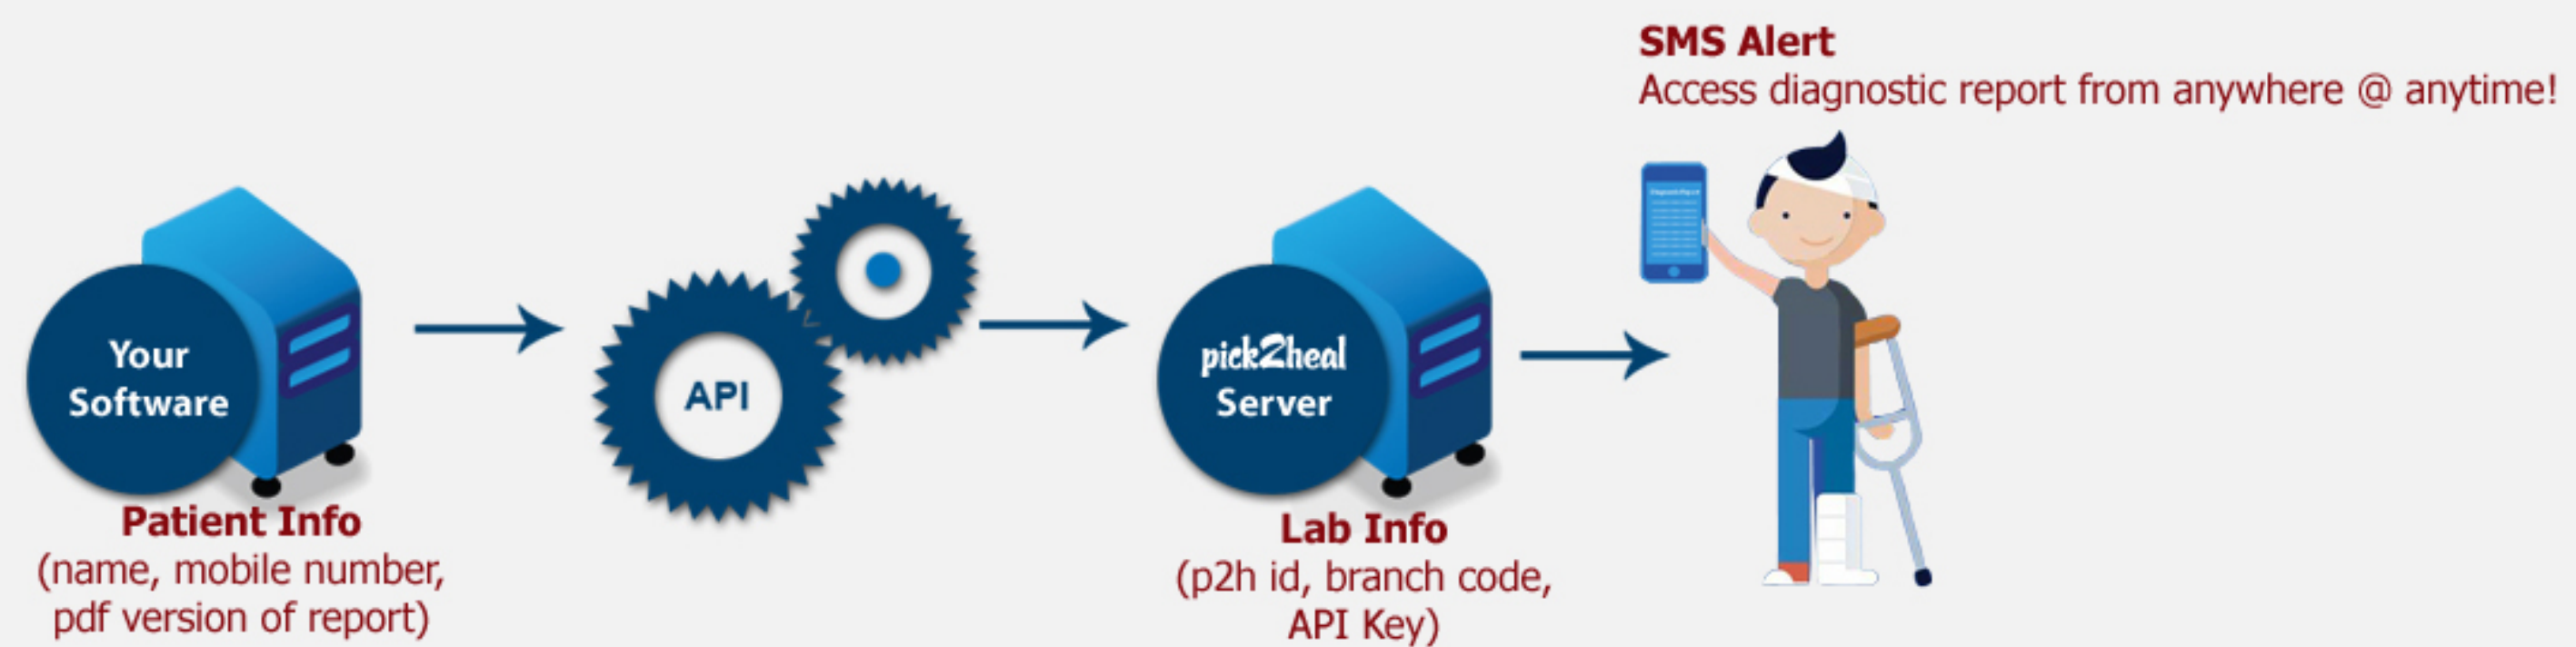

Make your LIMS software more efficient, feature rich and increase your business by adding pick2heal!

Let's go through the documentation

pick2heal is now ready to integrate with your LIMS software. By adding pick2heal API you can attract more labs as it is such a cost effective method for them to provide patients report online.!

SMS Alert
Access diagnostic report from anywhere @ anytime!

Your Software

API

pick2heal Server

Patient Info
(name, mobile number, pdf version of report)

Lab Info
(p2h id, branch code, API Key)

HTTP API

Integrating API to your software is quite simple process.

Submit the details mentioned to:

http://pick2heal.com/dheal/uploadreport/service

Request Format

Method   **POST**
Content-Type   **multipart/form-data**

Variable names and values.// You should initialize all the fields exactly as below.

The first four variable values listed below should get from the client application.

name - Patient's name.

mobile - Patient's mobile number.

email - Patient's email (optional) // This is an optional value. In case patient need mail alert can take this and otherwise not mandatory.

reportfile - Pdf version of reports.

You will get all the below values from the diagnostic centre's dashboard -> API page once they created a lab profile in www.pick2heal.com

phid - Diagnostic centre's profile p2h Id.

branch - Diagnostic centre's branch code. If multiple branches are associated to pick2heal, each branch have a different unique branch code.

apikey - Branch api key.In order to identify lab's branch, we need api key values. You can simply generate api key of corresponding lab branch where you are going to integrate API by clicking **Generate Key**

Test your LIMS by using the below values

Together with the values from your software, you can submit the below values mentioned and test whether your codes are working or not.

phid - PH1008

branch - BR1128

apikey - 9c81744da7b81ec80e851454dde2e603

Once your code is worked fine, that submitted mobile number will get an SMS as mentioned below.

Patient's name you submitted   Code to download lab report

Dear, **MR. XXXXX** your diagnostic report has been ready to download. Please do download it from www.pick2heal.com by placing the code **DC12784609263245**. By team **ABC LAB, Trivandrum** — Place where the lab is situated (Here it is Trivandrum)
